

Please amend the present application as follows:

**Claims**

The following is a copy of Applicant's claims that identifies language being added with underlining ("\_\_\_\_") and language being deleted with strikethrough ("~~\_\_\_\_\_~~") or brackets ("[[ ]]"), as is applicable:

1. (Previously presented) A method for facilitating secure printing, comprising:

receiving with a printer an untranslated document in a non-print ready format to be printed;

determining on the printer that the document cannot be printed in its present form;

transmitting the document from the printer to a nearby portable computing device; and

receiving with the printer a print ready version of the document from the portable computing device.

2-4. (Canceled)

5. (Previously presented) The method of claim 1, wherein transmitting the document comprises wirelessly transmitting the document and wherein receiving a print ready version of the document comprises wirelessly receiving the print ready version of the document.

6-12. (Canceled)

13. (Previously presented) A method for facilitating secure printing, comprising:

receiving with a portable computing device an untranslated document in a non-print ready format from a nearby printing device;

translating the document into a print ready format on the portable computing device; and

transmitting the translated document from the portable computing device back to the printing device so that the printing device can generate a hard copy of the document.

14. (Previously presented) The method of claim 13, wherein receiving the untranslated document comprises receiving the document via wireless communication and wherein transmitting the translated document comprises transmitting the document via wireless communication.

15-22. (Canceled)

23. (Previously presented) A printing device, comprising:

a processing device; and

memory including a security manager that is configured to facilitate transmission of an unencrypted document that is in a non-print ready format and therefore cannot be printed in its present form to a nearby portable computing device and further configured to receive a print ready version of the document from the portable computing device.

24. (Previously presented) The printing device of claim 23, further comprising a transceiver adapted to facilitate wireless communications between the printing device and the portable computing device.

25-27. (Canceled)

28. (Previously presented) A portable computing device, comprising:

a processing device; and

memory including a document translator that is configured to receive an untranslated document in a non-print ready format transmitted from a nearby printing device, translate the document into a print ready format, and facilitate transmission of the print ready document back to the printing device.

29. (Canceled)

30. (Previously presented) The portable computing device of claim 28, further comprising a transceiver adapted to facilitate wireless communications between the computing device and the printing device.

31. (Currently amended) A computer-readable medium that stores a computer program that facilitates secure printing, the program comprising:

logic configured to receive a document to be printed;

logic configured to determine that the document cannot be printed in its present form;

logic configured to facilitate transmission of the document to a nearby portable computing device; and

logic configured to receive a print ready version of the document from the portable computing device.

32. (Canceled)

33. (Previously presented) The computer-readable medium of claim 31, wherein the document has not been translated into a print ready format.

34-35. (Canceled)

36. (Currently amended) A computer-readable medium that stores a computer program that facilitates secure printing, the program comprising:

logic configured to ~~receive~~ identify an untranslated document received by a portable computing device from a nearby printing device;

logic configured to translate the document into a print ready format on the portable computing device; and

logic configured to facilitate transmission of the translated document from the portable computing device back to the printing device so that the printing device can generate a hard copy of the document.

37. (Canceled)

38. (Previously presented) The method of claim 1, wherein the portable computing device is a personal digital assistant, a mobile telephone, or a smart card.

39. (Canceled)

40. (Previously presented) The method of claim 13, wherein the portable computing device is a personal digital assistant, a mobile telephone, or a smart card.

41. (Canceled)

42. (Previously presented) The printing device of claim 23, wherein the portable computing device is a personal digital assistant, a mobile telephone, or a smart card.

43. (Canceled)

44. (Previously presented) The portable computing device of claim 28, wherein the portable computing device is a personal digital assistant, a mobile telephone, or a smart card.

45. (Previously presented) The computer-readable medium of claim 31, wherein the portable computing device is a personal digital assistant, a mobile telephone, or a smart card.

46. (Canceled)

47. (Previously presented) The computer-readable medium of claim 36, wherein the portable computing device is a personal digital assistant, a mobile telephone, or a smart card.
